
SmartMicroOptics for Education

We can provide **customized offers** for **all educational purposes, from primary schools to Universities**, with strong discounts and attention to the Institution needs. All our systems are the ideal solution to support Science classes which need a technical support for microscopy or macro photography.

All experiments with Blips and DIPLÉ systems can be easily made both **in class and at home**. To help us provide the best solution for your institution, please fill the following form to give us an insight of your needs.

Number of students:

Which is the students' age?

Location of classes and workshops (indoor or outdoor):

Interest in microscopy (yes or no)?

Are the classes interested in macro photography (yes or no)?

Are the classes interested in home schooling (yes or no)?

Which is your approximate budget (in € or USD)?

For when you need the items delivered (month/year)?

Any further information you think we should know?

Please compile all the parts of this form and send it as attachment in a mail to info@smartmicrooptics.com, we will provide our best quotation for your specific needs.
